

naked, except a slight edging of black hairs both on the upper and under lips. His body is short and compact. There are two tufts of hair, of a bright yellow, below the ears, and another tuft of bristly hair upon the top of the head. The hair on the body is of a greenish cast, and that on the breast and belly of an ash colour. He walks on all fours, and is about a foot and a half long. The female is subject to a periodical emanation.

---

## THE TALAPOIN.

---

THIS monkey, (*fig.* 211.) though small, is a beautiful animal. Its name seems to indicate that it is a native of Siam, and other eastern provinces of Asia; but though we cannot positively assert this, it is, however, certain that it belongs to the Old Continent, and is not found any where in the New, because it has pouches on each side of its cheeks, and callosities on its posteriors, which characters neither belong to the sagoins nor sapajous,
