

ued to the Forest Hills at Grace Dieu. For a more particular account of this section, see Chaps. X. and XXII.; and for an account of the sections near Dudley, in Staffordshire, see Chap. VII.

This brief sketch of the geology of England, with the references to the map, sections, and chapters in this volume, may suffice to give the reader a general view of the geology of England, and the situation of its principal mineral repositories. I shall subjoin an account of the thermal waters of England, and of a few celebrated thermal waters on the Continent, and a table of the height of mountains.

Height of some of the most remarkable Mountains and Hills in England and Wales.
