

CHAPTER VI

<i>Physiology of Animals</i> - - - - -	Page 51
--	------------

The Problem of Physiology—Ancient Physiology—Aristotle—Galen—Mediæval Physiology—Harvey—Physiology comes of age as a Specialism: Haller—Physiology becomes Comparative: Müller—Advance of Comparative Physiology—Chemical Aspects—Physical Aspects—Du Bois-Reymond—Experimental Physiology—The Study of Internal Secretions—Analysis of Nervous Mechanism—Cellular Physiology—The Protoplasmic Movement—Pathology—Reproduction in Animals.

CHAPTER VII

<i>Physiology of Plants</i> - - - - -	69
---------------------------------------	----

Empirical Stage—Influence from Animal Physiology—Nutrition in Plants—Movement and Feeling in Plants—Sachs—Reproduction in Plants—Ancient Conjectures as to Sexuality of Plants—Camerarius—Kœlreuter—Sprengel—The Act of Fertilization—Sexuality of Cryptogams—Experiments on Sex and Reproduction.

CHAPTER VIII

<i>The Conditions of Life and Death</i> - - - - -	82
---	----

Three Periods of Opinion—The Organism and the Inorganic World—The Quick and the Dead—Characteristics of Living Organisms—"Vital Force"—The Kinds of Death—Organic Immortality—General Conditions of Life—Origin of Life—Ancient Belief in Spontaneous Generation—Mediæval Beliefs—Redi's Experiments—Slow Death of the Theory of Spontaneous Generation—Pouchet and Pasteur—Tyndall—The Fact of Biogenesis—Opinions as to the Origin of Life upon the Earth.

CHAPTER IX

<i>Cell and Protoplasm</i> - - - - -	101
--------------------------------------	-----

The Early Microscopists—Bichat's step—The Cell-theory—Corroboration of the Cell-theory—Criticism of the Cell-theory—Modern Analysis of the Cell—Cell-division—The Cell-cycle—Structure of the Cell-substance—Protoplasm—Anabolism and Katabolism—Conception of Ultimate Vital Organization.

CHAPTER X

<i>Embryology</i> - - - - -	117
-----------------------------	-----

The Scope of Embryology—Ancient Embryology—Harvey—Bonnet and the Preformationists—Wolff and Epigenesis—Von Baer—Alternations of Generations—Influence of the Cell-theory—Nature of the Ovum—Nature of the Spermatozoon—Fertilization—Maturation—The Mode of
