

PART II.—AN ACCOUNT OF THE COMPOSITION OF THE EARTH'S  
CRUST—MINERALS AND ROCKS

I. GENERAL CHEMICAL CONSTITUTION OF THE CRUST . . . . .	112
II. ROCK-FORMING MINERALS . . . . .	119
III. DETERMINATION OF ROCKS . . . . .	145
1. Megascopic Examination, 146—ii. Chemical Analysis, 157—iii. Chemical Synthesis, 160—iv. Microscopic Investigation, 161.	
IV. GENERAL OUTWARD OR MEGASCOPIIC CHARACTERS OF ROCKS . . . . .	172
1. Structure, 172—2. Composition, 186—3. State of Aggregation, 187—4. Color and Lustre, 189—5. Feel and Smell, 191—6. Specific Gravity, 192—7. Magnetism, 192	
V. MICROSCOPIC CHARACTERS OF ROCKS . . . . .	192
1. Microscopic Elements of Rocks, 194—2. Microscopic Structures of Rocks, 208.	
VI. CLASSIFICATION OF ROCKS . . . . .	218
VII. A DESCRIPTION OF THE MORE IMPORTANT ROCKS OF THE EARTH'S CRUST . . . . .	223
i. SEDIMENTARY . . . . .	223
A. <i>Fragmental (Clastic)</i> . . . . .	223
1. Gravel and Sand Rocks (Psammites) . . . . .	224
2. Clay Rocks (Pelites) . . . . .	233
3. Volcanic Fragmental Rocks (Tuffs) . . . . .	238
4. Fragmental Rocks of Organic Origin . . . . .	243
(1) Calcareous, 243—(2) Siliceous, 247—(3) Phosphatic, 248—(4) Car- bonaceous, 249—(5) Ferruginous, 255.	
B. <i>Crystalline, including Rocks formed from Chemical             Precipitation</i> . . . . .	258
ii. MASSIVE, ERUPTIVE, IGNEOUS . . . . .	269
i. Acid Series, 272—ii. Intermediate Series, 284—iii. Basic Series, 298.	
iii. SCHISTOSE (METAMORPHIC) . . . . .	303
1. Argillites, 309—2. Quartz-Rocks, 310—3. Pyroxene-Rocks, 313—4. Hornblende-Rocks, 314—5. Garnet-Rocks, 315—6. Epidote-Rocks, 315—7. Chlorite-Rocks, 315—8. Talc-Rocks, 315—9. Olivine- Rocks, or Peridotites, 316—10. Felsitoid-Rocks, 316—11. Quartz- and Tourmaline-Rocks, 317—12. Quartz- and Mica-Rocks, 317— 13. Quartz- and Felspar-Rocks, 319—14. Quartz-, Felspar-, and Mica-Rocks, 320—15. Quartz-, Felspar-, and Garnet-Rocks, 322—16. Felspar- and Mica-Rocks, 322—Composition of some Schistose Rocks, 323.
