

| Fig. |                                                                                                   | Page |
|------|---------------------------------------------------------------------------------------------------|------|
| 343  | Magnified lateral view of the anterior extremity of the dorsal vessel, (original) . . . . .       | 177  |
| 344  | Magnified dorsal view of the same, (original) . . . . .                                           | 177  |
| 345  | Structure of the valves of the dorsal vessel, (original) . . . . .                                | 177  |
| 346  | Heart and vessels of the <i>Aranea domestica</i> , (Treviranus) . . . . .                         | 180  |
| 346* | Circulation in the <i>Planaria nigra</i> , (Dugès) . . . . .                                      | 181  |
| 347  | Course of circulation in the <i>Erpobdella vulgaris</i> , (Morren) . . . . .                      | 183  |
| 348  | Vessels in abdominal surface of the same, (id.) . . . . .                                         | 183  |
| 349  | Vascular dilatations, or hearts of the <i>Lumbricus terrestris</i> , (Morren) . . . . .           | 184  |
| 350  | Cavities and great vessels of the Heart, . . . . .                                                | 187  |
| 351  | The Heart laid open to show its Valves, . . . . .                                                 | 188  |
| 352  | Plan of simple circulation, . . . . .                                                             | 189  |
| 353  | Plan of double circulation, . . . . .                                                             | 191  |
| 354  | Branchial circulation in <i>Maia Squinado</i> , (Audouin) . . . . .                               | 193  |
| 355  | Organs of circulation in the <i>Loligo sagittata</i> , (id.) . . . . .                            | 195  |
| 356  | Plan of circulation in Fishes, . . . . .                                                          | 196  |
| 357  | Plan of circulation in Batrachia, . . . . .                                                       | 197  |
| 359  | Plan of double or warm-blooded circulation, . . . . .                                             | 199  |
| 360  | Heart of the <i>Dugong</i> , (Home) . . . . .                                                     | 200  |
| 365  | Valves of the Veins, (Cloquet) . . . . .                                                          | 206  |
| 366  | Heart, branchial artery, and gills of a fish, (Blasius) . . . . .                                 | 216  |
| 367  | Branchial apertures in the <i>Squalus glaucus</i> , (Bonnaterre) . . . . .                        | 216  |
| 368  | Branchial apertures in the <i>Petromyzon marinus</i> , (id.) . . . . .                            | 216  |
| 369  | Internal structure of the branchiæ of the same, (Home) . . . . .                                  | 216  |
| 370  | Stigmata in the abdominal surface of the <i>Dytiscus marginalis</i> , (Léon Dufour) . . . . .     | 222  |
| 371  | Stigmata of the <i>Cerambyx heros</i> , (Fab.) magnified, (id.) . . . . .                         | 222  |
| 372  | Longitudinal trachææ of <i>Carabus auratus</i> , (id.) . . . . .                                  | 222  |
| 373  | Air vesicles and trachææ of the <i>Scolia hortorum</i> , (Fab.) highly magnified, (id.) . . . . . | 222  |
| 374  | Respiratory apparatus of the <i>Scorpio europæus</i> , (Treviranus) . . . . .                     | 225  |
| 375  | Internal structure of the lungs of the <i>Turtle</i> , (Bojanus) . . . . .                        | 229  |
| 377  | Air cells of the <i>Ostrich</i> , (Parisian Academicians) . . . . .                               | 233  |
| 378  | Lymphatic Absorbents, . . . . .                                                                   | 250  |
| 379  | Passage of Nerves through a ganglion, . . . . .                                                   | 255  |
| 380  | Plexus of Nerves, . . . . .                                                                       | 255  |
| 381  | Varieties of forms of antennæ of Insects, (Goldfuss) . . . . .                                    | 272  |
| 382  | Vertical and longitudinal section of the right nostril in man, . . . . .                          | 283  |
| 383  | Vertical transverse section of the same, . . . . .                                                | 284  |
| 384  | Transverse section of the nostril of a <i>Sheep</i> , (Harwood) . . . . .                         | 285  |
| 385  | Turbinated bones of the <i>Nose</i> , (id.) . . . . .                                             | 285  |
